

E35066

Protective tube for infrared temperature sensors

PROTECTIVE TUBE

| Application     |                                                    |
|-----------------|----------------------------------------------------|
| Design          | for infrared temperature sensors TWxxxx, M30       |
| Installation    | protection against dirt and extraneous light; (TW) |
| Mechanical data |                                                    |
| Weight [g]      | 499                                                |
| Materials       | stainless steel (1.4301 / 304)                     |
| Remarks         |                                                    |
| Pack quantity   | 1 pcs.                                             |
